

Two Rivers Emergency Management, LLC (TREM) provides practitioner-led planning, mitigation, exercises, hazardous materials analysis, risk assessment, continuity, and program-development support. TREM combines senior project involvement with focused teams and project delivery built for implementation.

CORE CAPABILITIES

- Emergency Operations Plans, annexes, and emergency action planning
- Multi-jurisdictional hazard mitigation planning
- Training, exercises, evaluation, and improvement planning
- Hazardous Materials Commodity Flow Studies and ESF-10 planning
- Continuity of operations and organizational continuity
- Hazard and risk assessments
- SOP, SOG, policy, and operational procedure development
- Emergency management program assessment and strategic development
- Special event planning and operational support
- Grant strategy and program support

WHY TREM

- Senior practitioners remain involved from kickoff through delivery.
- Direct access to the professionals responsible for decisions and deliverables.
- Recommendations are evaluated against staffing, authority, resources, and implementation realities.
- Project teams scale with qualified specialists when the scope requires added expertise.
- River Gauge supports project visibility, reviews, tasks, documents, and client communication for participating projects.
